

IT and Cloud Operations SOP

Nexora Technologies Pvt Ltd | Controlled Internal Document

Document ID: NEX-OPS-SOP-001

Version: 2.0

Status: Active

Effective Date: 2026-09-01

Owner: IT Operations

Category: IT Operations

1. Access Requests

Access requests require an identified employee, system, role, business justification, and approving manager. Privileged access requires additional approval.

2. Monitoring

Operations monitors service availability, resource health, security alerts, and scheduled jobs. Alerts are triaged according to severity.

3. Backups

Critical systems follow the approved backup schedule. Backup failures are investigated and recorded.

4. Change Management

Material infrastructure changes require a change record, risk assessment, implementation plan, validation, and rollback approach.

5. Incident Handover

Incidents crossing shifts must include current impact, actions taken, evidence, owner, next step, and escalation status.
