

Security Incident Response Process

Nexora Technologies Pvt Ltd | Controlled Internal Document

Document ID: NEX-PROC-002

Version: 2.0

Status: Active

Effective Date: 2026-09-01

Owner: Information Security

Category: Information Security

1. Detect and Report

Employee or monitoring system identifies a suspected incident and reports it immediately.

2. Triage

Information Security classifies severity, affected systems, data types, and business impact.

3. Contain

Authorized responders isolate accounts, systems, tokens, or network paths as appropriate.

4. Investigate

Responders preserve evidence, determine scope, identify root cause, and document actions.

5. Recover

Affected services are restored using approved recovery procedures and validated before normal operation.

6. Review

The incident is closed only after required evidence, lessons learned, corrective actions, and stakeholder notifications are documented.
